

Self-Sealing Screws for Laths

Fasten Seal Products LLC

May 9, 2012

Self-sealing screws for lath
Fasten Seal Products LLC

The company manufactures ICC-rated self-sealing screws for lath installation. The self-drilling screws for use with steel framing contain butyl rubber sealant in a bright green washer—the paper penetration is sealed simultaneously during installation. The bright color of the washer makes inspections easier. The company offers other self sealing nails and screws that can be found on its Web site.
